Custom white balance. brettprobert. January 2016 edited January 2016 Posted in » Nikon D3200 Forum. Is it possible to set the white balance to a specific Kelvin temperature (like 5775K) on the D3200? If so, how? I know I can approximate using presets, grey card, etc., but I'm wondering if it can be exacted. Thanks! Comments.

If you shoot in RAW format, you can experiment with different white balance settings when you process the RAW file. You also have the ability to interactively adjust white balance based on color temperture — this gives you even more fine-grain control over white balance.

### **The Correct White Balance - Learn Photography**

White Balance White balance ensures that colors are unaffected by the color of the light source. Auto white balance is recommended for most light sources; in P, S, A, and M modes, other values can be selected if necessary according to the type of source: Option Description Automatic white balance adjustment.

If you're having trouble with white balance and none of the standard White Balance settings do the trick (and you don't want to fool with fine-tuning them), take advantage of the PRE (Preset Manual) feature. This option enables you to base white balance on a direct measurement of the actual lighting conditions or match white [...]
