Troubleshooting Cummins Diesel Engines

Starting problems If the diesel engine won't start, but turns over quickly on the starter motor, then a fuel problem - as above - is the most likely cause. However, in cold weather it's worth checking the glow plugs: these are pre-heaters fitted to most diesel engines to warm the air in the intake to improve cold starting.

Diesel engine repairs: fuel, air, starting, wiring - boats.com

Marine auxiliary diesel engines are used for the production of electricity on board merchant ships. They are called auxiliary because the main diesel engines are used for the propulsion of the ship. The auxiliary engines are generally four stroke diesel engines. This article briefly tries to explain the various causes of engine problems.

Marine Auxiliary Diesel Engine Starting problems

Some engines only use the glow plugs when cold but others will allow the glow plugs to work when the ECU (vehicle's computer) needs them to be on to help with combustion. Problems in this area will cause diesel engine starting problems, uneven running and white smoke when the engine is cold. Insufficient fuel supply
