Isotemp Hotplates, Stirrers and Stirring Hotplates

A continuous stirred tank reactor (CSTR) is a batch reactor equipped with an impeller or other mixing device to provide efficient mixing. In chemical engineering the name CSTR is often used to refer to an idealised agitated tank reactor used to model operation variables required to attain a specified output.

Continuous Stirred Tank Reactor (CSTR) - Vapourtec

liquids and reduced power for long-term operation without heat generation. You can stir liquids in various shapes of vessel (e.g. Erlenmeyer flasks, beakers). As the rotation speed can be variably adjusted, liquids can be moved both gently as well as vigorously mixed. The stirring vessel contains a magnetic stirring bar. When the stirring ...
