Your Check Engine Light may be indicating a simple problem that's easy to fix—such as a loose gas cap that needs to be replaced. It could also be a warning of a serious problem that could damage your engine components. Your Check Engine Light blinks or glows depending on what's wrong with your vehicle.

If your Check Engine light comes on while the DPF status light is flashing, it means you need to perform a parked regen right away. You may also hear a beeping sound to further alert you. Here's what you should do: Park your truck. Pull it well off the highway - not in a grassy area or where there are flammable or combustible materials nearby.

**DPF Lights | What to Look for When They Come On**

Hello, I need ask all of the RV Gurus of the forum a question that hopefully someone can help with. First a little background. Ive had a Check engine light on my coach for a few months; its been running like a top since we had the alternator replaced back in September. About then is when the ligh...
