Mentalizing as a Compass for Treatment. The educational material is based on research in the Menninger Child and Family Program. The educational sessions are conducted like seminars in which the leaders and patients collaborate in understanding these concepts and their application to treatment.

**Clinical Resources - Understanding Mentalizing**

Mentalization, or better mentalizing, is the process by which we make sense of each other and ourselves, implicitly and explicitly, in terms of subjective states and mental processes. It is a profoundly social construct in the sense that we are attentive to the mental states of those we are with, physically or psychologically.

**Mentalization based treatment for borderline personality ...**

Mentalization-based therapy for BPD is a psychodynamic psychotherapy, which means that the focus of the therapy is on the interaction between the patient and the therapist. In this therapy, the therapist will focus on the present rather than the past and will work with you to enhance your emotional recognition and connection.
