Touch Points Math - Pinterest

I observed TOUCH POINT MATH from my son over 15 years ago, whom he learned from his very dear and giving resource teacher, Mrs. Jennifer Hightower from St. Bernadette School . So, time and patterns have changed, but the concept has stood the test of time. See the chart above to see the placement of the dots and circles.

Math Subtraction with Touch Points for Autism: Five vertical single digit subtraction math problems per page. Touch points are provided on all single digit numbers. Fact groupings 0-9 are included. Subtraction groupings are displayed in number sequence per page. Cut and paste answer choices are at the bottom of each page.

Counting With Touch Points - Autism Educators

When teaching addition using Touch Math, the first thing you must do is teach students the touch points for numerals one through nine. The best way to do this is by making a laminated number line for each of your students. This number line would list the numbers one through nine with the touch points clearly marked on each numeral.

Strategies for Using Touch Math to Help Struggling ...

Touch Math does teach a great method for knowing the multiplication facts as well. Touch math allows every student to move beyond fact knowledge and into the realm of real math applications. My first grade students learned the touch points in one week and do not count on their fingers at all.

Touch Math- Ideas for Teaching, Resources for Lesson Plans ...

Every number from one through nine has physical points on the actual number that the user will touch. These are the "TouchPoints." Numbers one through five each have single points the user touches. Numbers six through nine have double points or a combination of double and single points that the user taps. These points are represented by dots.
