If a scope is mounted too far to the rear, the eyepiece can injure the shoot-er's brow . Shooting at an uphill angle also increases this hazard because it shortens the distance between the brow and the rear of the scope . For this reason, Leupold scopes are engineered to provide generous eye relief .

Leupold has also recently joined the very high end tactical scope market with their Mark 6 and Mark 8 series of scopes. Over the years we at Sniper Central have probably used more Leupold tactical scopes than any of the other brands, but we have only done a single full review of the Leupold scope that is used on the US Army M110 SASS rifle.

### **Leupold Mark 4 4.5-14x50mm M1 Mildot - Sniper Central**

Your new scope, even with its technologically advanced design and features, will not perform at its best if not properly mounted. One of the most important contributing factors to the accuracy of your scope and rifle is the selection of the mount and the care with which mounting is done. Dependable mounts that attach your scope solidly to the rifle
