### **how to adjust alpha one shift cables - JustAnswer**

Mercury Marine's MerCruiser stern drive system consists of the engine, outdrive and operator controls. After years of use, the shift cable tends to stretch causing the need for adjustment and realignment. When the shift cable is in the forward position, the cable will be pulled inside the sheathing at the shift plate.

### **How to Adjust a MerCruiser Shift Cable | Gone Outdoors ...**

The MerCruiser throttle cable attaches to a kill switch to help the gears shift from forward to reverse. There is no neutral gear, so the kill switch serves this purpose. A novice may think the sound of the killed engine is a sign the throttle isn't working properly, which is not correct.

### **How to Adjust the Throttle Cable on a MerCruiser | Gone ...**

The idle rpms should be at 650 with the engine in gear. When you shift into gear with firm solid motion. The drive will clunk some due to the fact you are moving metal shift dog into metal gears. If the engine doesn't return to idle when shifted in and out of gear the throttle cable is not adjusted properly.
