RE: Laser 4-stroke engines One "think about" if you decide on LASER engines. Due to the rather unorthodox carb positioning, MAKE SURE that you have the engine set up as close as possible (carb adjustments) as getting to the idle needle is the proverbial BI*** once cowed.

Laser 4-stroke engines - RCU Forums - RC Universe

The Ford Laser was a restyled version of the Familia/323 models produced by Mazda in Japan from 1980 onwards. Ford had acquired a 25% stake in Mazda in 1979. Platform and assembly-line sharing with the locally produced Mazda Familia in Japan allowed the Laser in that market to be offered with a plethora of engine, paint and trim configurations not available anywhere else in the world.

SSR Motorsports LAZER 5

Laser propulsion is a form of beam-powered propulsion where the energy source is a remote (usually ground-based) laser system and separate from the reaction mass. This form of propulsion differs from a conventional chemical rocket where both energy and reaction mass come from the solid or liquid propellants carried on board the vehicle.

Laser propulsion - Wikipedia

That's why, at Exmark, we give so much thought to matching engine and machine for the most optimized mower performance possible. On select models, we even develop our own engines - built precisely to our specifications and allowing us to control engine quality from start to finish.

" I would like to run my Laser engine on petrol and have seen petrol conversion kits online. Is it possible to convert the engine? We do not recommend customers attempt to convert their engines to petrol. We have had numerous engines returned for repair following failed conversions. Through our own testing we have found the carb's supplied in ...
