Engine Stop Switch and Switch Clip Choke Knob (H type manual choke) The engine stop switch has controls for normal engine stopping and emergency engine stopping. The switch clip must be inserted in the engine stop switch in order for the engine to start and run.

The engine exhaust from this - American Honda Motor Company

A9 (c) On DS Marine Engine, when operating the engine, make gear shifts ahead and astern quickly and decisively. This is because jaw clutches are used in the SSR transmission and quick engagement prevents the clashing of teeth that will occur if you attempt easy engagement as you would with friction clutches.

Marine Diesel Engines Marine Diesel Generators

Many manual starters included a one-directional slip or release provision so that once engine rotation began, the starter would disengage from the engine. In the event of a kickback, the reverse rotation of the engine could suddenly engage the starter, causing the crank to unexpectedly and violently jerk, possibly injuring the operator.

Starter (engine) - Wikipedia

Kodiak engines use the GM Marine Engine Fuel Injection (MEFI) engine control module (ECM). The MEFI ECM brings automotive reliability, low emissions and fuel savings to the marine sport engine. The MEFI ECM allows the use of electronic throttles and advanced user features. Smart start means the starter will not engage a running engine.
