### **Diesel Locomotive Mechanic Job Description - cvs.com**

Gasoline engines are much closer to a 1:1 ratio. The reason why diesel engines produce so much torque stems from three key things: 1) boost created by the turbocharger, 2) stroke, and 3) cylinder pressure. At the present time, production diesel engines see 25 to 35 psi of boost straight from the factory.

### **A Beginner's Guide To Understanding Diesel Engines**

Diesel locomotives. The 1955 diesel locomotive classes are given in brackets where applicable.. A large number of different shunter types were purchased by British Rail and its predecessors, many of which were withdrawn prior to the introduction of TOPS. The tables below attempt to list the different types and the different classifications used to describe them as clearly as possible:
