Ten Reasons When Manual Focus Is Better Than Auto Focus

We then continued to use complete manual focus on our lens, controlling the perspective and depth of field of our subject. But why would you want to use Manual focus anyway? When our lives have made easy to just point and shoot with Autofocus. Believe it or not, both Manual Focus and Autofocus has its pros and cons to using them.

Skills in Practice: Auto Focus Vs. Manual Focus - A Field ...

To prevent that, you will have to focus manually by twisting the focus ring on your lens. And to do that right, you will need a lot of practice and experimenting, since manual focus depends on your skills as well as your camera's features and properties. Manual Focus: 6 Advantages and When to Use It

Manual Focus Vs. Autofocus - Practical Application

In a manual focus camera, movements to the lens ring adjust the angle of two mirrors. The two images this produces will eventually line up, bringing the scene into focus. Autofocus works on this same principle, however instead of the user judging when the image is in focus, the camera uses an electronic sensor to do the same job.

Photography Basics #4: Digital Auto Focus vs Manual Focus

Once it gets dark, autofocus becomes less accurate until it stops working all together. I shoot landscapes so I use manual focus in a magnified live view way more often. Auto focus can be a hindrance to me when I want to capture a perfect moment as the camera searches for what it thinks is the ideal focus.
