MBE 4000 product engineer Steffan Maier says this is simply the heat generated by compressing great volumes of air. "In effect, we're turning kinetic energy, created by the motion of the truck, into heat energy by using the truck's momentum to drive the big air compressor that doubles as an engine," he says.

ROAD TEST: MBE 4000 ENGINE | Today's Trucking

I have a 2005 Freightliner Columbia with Mercedes MBE 4000 engine. This truck has been nothing but problems from day one. At 290K the coolant started to leak from head gaskets, so the dealer replaced liners, pistons and head gaskets under warranty. Now at 415K, just 15K out of warranty, the same problem is happening.
