Managing Business Process Flows, 2nd Edition - Pearson

Business process management is neither task management (which focuses on individual tasks) or project management (which handles one-time or unpredictable flows). Task management is about handling or organizing a set of activities that arise out of a project.

Business Process Management - Definition, Steps, Benefits ...

A workflow management system (WfMS) is a software system for setting up, performing, and monitoring of a defined sequence of processes and tasks, with the broad goals of increasing productivity, reducing costs, becoming more agile, and improving information exchange within an organization. These systems may be process-centric or data-centric, and they may represent the workflow as graphical maps.

Workflow - Wikipedia
