Lens Vs Manual

How Does Manual Focus Work? A DSLR camera uses a lens and internal mirrors to direct light onto a digital sensor. This then produces an image. However, much like the human eye, if the lens isn't focused, the final result will be blurry and out of focus.

Photography Basics #4: Digital Auto Focus vs Manual Focus

The high end Yashica lenses in the 80's and 90's were made by Kyocera, the same company that made most of the Zeiss lenses for 35mm SLR's. They are really very good. My Yashica 80-200 f4 zoom is the best zoom lens I have ever used in that focal length range and I have used some really good ones including the Nikon 80-200 f2.8.

Manual lenses vs autofocus lenses? - Photography Forum

Once you learn how to take good pictures with a manual lens, shooting with your modern gear will seem easier than ever, and you might even use it more creatively. These are just a few reasons why every photographer should spend some time with a manual focus only lens....

Why Every Photographer Should Use a Manual Focus Lens

Lens - auto vs manual vs auto Jul 24, 2010 I bought a pentax-KX few weeks ago, my first and only camera, with 18-55 kit lens. I am planning to buy some new lenses. anyone can please explain me the advantage of Auto focus lens over manual focus lens? If I can manually focus then what is the circumstance we really need the auto lenses? ...

Lens - auto vs manual vs auto: Beginners Questions Forum ...

We then continued to use complete manual focus on our lens, controlling the perspective and depth of field of our subject. But why would you want to use Manual focus anyway? When our lives have made easy to just point and shoot with Autofocus. Believe it or not, both Manual Focus and Autofocus has its pros and cons to using them.
