I have a Mercruiser 7.3l 270hp V8 diesel AC driving a Bravo 2 leg on a 31ft sportsfisher. It starts brilliantly but if I run for an hour, shut down the motor and try to start again after say, 15 minutes, it is very difficult to start. It takes a lot of turning over but eventually fires up. Do you have any thoughts as to the possible problem ?

Mercury or MerCruiser manufactures marine engines. A line of sterndrives e.g. inboard/outboard drives and inboard motors. MerCruiser motors are the most common motorized method for propelling small and large watercrafts, a major reason being that they can easily be removed for repairs or simply to create more room for storage.
