6.1 Absorption Costing. These variable manufacturing costs are usually made up of direct materials, variable manufacturing overhead, and direct labor. The product costs (or cost of goods sold) would include direct materials, direct labor and overhead. The period costs would include selling, general and administrative costs.

6.1 Absorption Costing | Managerial Accounting

6.2 Variable Costing. Under variable costing, companies treat only variable manufacturing costs as product costs. The logic behind this expensing of fixed manufacturing costs is that the company would incur such costs whether a plant was in production or idle. Therefore, these fixed costs do not specifically relate to the manufacture of products.

Solution Manual for Managerial Accounting 16th Edition by ...

Variable costing is a methodology that only assigns variable costs to inventory. This approach means that all overhead costs are charged to expense in the period incurred, while direct materials and variable overhead costs are assigned to inventory. There are no uses for variable costing in financial reporting, since the accounting frameworks (such as GAAP and IFRS) require that overhead also ...

Variable costing — AccountingTools

Variable Costing. The product cost under absorption costing is \$10 per unit, consisting of the variable cost components ($\$2 + \$3 + \$4 = \9) and \$1 of allocated fixed factory overhead ($\$10,000/10,000$ units). Under variable costing, the product cost is limited to the variable production costs of \$9.
