I have a quick question about the mercruiser shift interrupter. I just bought a boat and it dies everytime I put it in gear. We bypassed the interrupter switch when putting it in gear (not taking it out of gear) and had not problems. So that leaves no doubt that the problem we have is the lower shift cable.

So what is this switch for? I have been looking at the engine and having a fiddle and i have come to the conclusion that the gear shift cable needs replacing as its stiff, If you look at the gear plate you can clearly see that if the shift cable (shift plate to drive) was moving freely it would trigger the switch meaning it WILL cut the engine ...
