Digital Cameras With Manual Focus Ring - backupershutter

Before there was autofocus, there was focus. The camera is a light-tight box that is used to expose a photosensitive surface (film or digital sensor) to light. In order to focus the light onto the surface, most cameras (and your own eyes) use a lens to direct the light. Why did I say, "Most?" Well, there are many types of cameras around that do not rely on lenses to focus

How Focus Works | B&H Explora

When reading manuals or photography magazines and books, you will come across the term, 'focus your camera to infinity'. You may also notice the word or infinity symbol on one of your camera lenses. This can usually be found when you turn your camera lens to manual focus (MF) and rotate the focus ring either [...]
