*Merely said, the live sound engineering is universally compatible with any devices to read*

### **Live Sound Engineering**

How Live Sound Engineering Works. Good live sound engineering and concert sound engineering requires more than plugging in some amplifiers and turning a few volume knobs. It demands knowledge of acoustics and electronics combined with the collaborative skill of an artist to work with a band or producer to give them the sound they want.

### **How Live Sound Engineering Works | HowStuffWorks**

Live sound mixing. Live sound mixing is the process of electrically or digitally blending together multiple sound sources at a live event by an audio engineer using a mixing console or software. Sounds that are mixed include those from instruments and voices which are picked up by microphones (for drum kit,...
