Exhaust manifolds, carburetors, marine engines and parts.

Exhaust Manifolds. The exhaust manifold on a boat works much the same way as one on a car. The manifold is made of cast metal, a pipe within a pipe. It collects hot gases from the engine, which are cooled by water housed within the outer casing. Without water to cool these gases, hoses and pipes would be destroyed.

Amazon.com: Marine Exhaust Manifold

Marine engine exhaust riser and manifolds are important parts of an engine's exhaust system. An exhaust riser cools the engine exhaust before it is sent to the engine's exhaust hose. Mostly, the exhaust risers and exhaust manifolds are equal in number and their total number depends on the type of the engine. The following article describes the construction and function of marine engine risers ...

Marine Engine Exhaust Riser & Exhaust Manifolds: What it ...

While few exist today, this Model B-3 appears complete and rotates freely, making it a good candidate for restoration for display or use in your early launch. The exhaust manifold will need a welding repair but all other parts of the engine appear sound. 38354-- Feet 1918 Liberty 6 Marine Engine: \$50,000
