Having an LS swap was a dream for most people just a few years ago but now you too can have an LS swapped or upgraded car. Using some smart combos you can have the torque of the LS V8 for less than the cost of a set of wheels. The LS series engines come in many configurations and range from 4.8L up to 7.0L with the 5.7L LS1 being the most common swap choice.

Building 500HP LS engine. This sounds like a tough task. For a gen one engine it requires tons of aftermarket parts but an LS1, LS3 or LS6 engine can make tons of power with very little mods. Usually a big cam will get you close with a good tune on the ECU. Building 500HP LS engine with stock heads will require some port work.

I have a LS1 that I purchased from a junkyard 4 years ago. It has been sitting in my garage for 4 years. Should I re-ring and bearing the block or do you think its fine? I also plan to add a cam, and heads possibly. Does anyone know of any combos that will get me at least 500HP? I cant decide on what cam either. Each place has a few different durations.
