Improper spreader settings can lead to a waste of time and money if too much product is used and callbacks from customers if too little product is dispersed. Starting with the appropriate setting for your specific machine will help. When using a LESCO product, find the designated setting listed on the bag and then cross reference that number to your particular spreader type using the attached

Determining Spreader Settings | LESCO

I, too use Lesco Spreader/Sticker in my 200 gal. nurse tank. It's cheap insurance and well worth it. I use 2 pts. (1 qt.) per 100. I also use Recede from Lesco in the bulk tank to knock down the foam before it gets to the Turf Tracker or PG.

Spreader Sticker (lesco's) | LawnSite

The difference between a surfactant and a spreader sticker is how it affects the active ingredient. A surfactant makes the active ingredient spread more evenly across the leaf. A spreader sticker is usually a resin based material that will mix with the active ingredient and bind it to the surface of the leaf.
