I have a Lennox Elite Series furnace C 23-26-1. It constantly turns off and runs for different lengths of time. When it shuts off we have to turn off the furnace, turn it back on, then move an orange wire located on the blue (I'm assuming circuit) box and wait to hear a clicking noise (like you hear on a gas stove).

UNCASSED AND FULL CASSED UP-FLOW ENGINEERING DATA - LENNOX EMEA

We have 2 Lennox g26q3 furnaces at in our local Historical Society Museum, plus three more Lennox furnaces in an other building. To put it short - they are junk; poorly designed and built with cheap components. The two g26q3 furnaces both fail 2-3 times a year, typically on a holiday. (I've become really good at repairing them).

I have a Lennox C23-26-1 and it will lite, but only stay lit for a few minutes. Also it is not really blowing warm air out of the vents. My thermostat says low battery, but we have changed them twice to make sure. I cleaned the flame sensor and it worked for a day or so, but now it is back to only coming on briefly and not blowing war air out.

HVAC Repair Parts & Accessories | HVACPartsShop.com

The model number you provided is actually the model number for the evaporator assembly that is installed on top of your furnace. It would be helpful if you posted the model number for your furnace. You should be able to find the model number in the same compartment that the furnace's gas valve is located in.
